MULTIPURPOSE APPLICATION

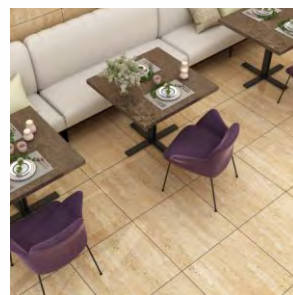

Our stoneware uses a minimal texture and a palette of expressive and versatile colors to embody the sensory experience of architecture. The inspiration for the project is the experience of authenticity achieved by re-using a variety of industrial surfaces, contemporary interior design icons, and developed through sophisticated colors for the modern home, a chromatic scale of neutral hues accompanied by brighter accents to create contrasts and enrich every space. The compositional possibilities offered by Blend are extended with exclusive multicolor solutions, granting evocative and scenographic licence to the interior decorator.

Magnificence Of
Artistry

Luxuriance

As accents, the idea is to break the monotony of the solid colored walls with upholstery, furniture and decoration indigenous to this area.

Style Of Fabulous finesse

The shades that comprise the Decor series, thanks to their sobriety and naturalness, perfectly integrate with the contemporary style of home furnishing. The minute details that characterized the Decor collection are seen best in the three dimensional structures decor, for example, built from small bush-hammered, honed and sand-blasted pieces, or in the Rub decor, which with its worked surface, tells the story of the material quality of sedimentary stone. The Wall Caddle interprets an assemblage of tradition, which combines perfectly with the rest of the collection.
